Subject: Regarding high similarity index in plagiarism report.

Respected sir,

For the past 6 months me and my group mate Nikhik K(18BCE2321) have been working on our capstone project under Yokesb Babu S. We took our plagiarism report on May 17, 2022 and we got a similarity index of 49% out of which 39% is from VIT university student paper. This is because we had already given a plagiarism check on for our research paper on April 7,2022 which covers all the main content written in our final report, and that report only has a similarity index of 3% during plagiarism check. If we remove the 49% our overall plagiarism content is only 10%, which is prescribed by VIT university. Please consider this while evaluating our project sir.

I Have attached plagiarism report of our research paper and final paper.

Research Paper:
